

# TRENDS IN MARITIME HIGHER EDUCATION

Volume 23 Number 1

-Annual Digest-

January 2026

## UNIVERSITY ENROLMENT 2024-2025

In 2024-2025, **75,982** students were enrolled in Maritime universities, a 2.0% decrease compared to the previous year, but an increase of 8.7% and 11.2% over five and ten years, respectively. Overall, undergraduate enrolment decreased by 2.1%, and graduate enrolment decreased by 1.4%.

Enrolment in *Education* programs increased by 5.0% and in *Health and related fields* increased by 1.2% over one year. Enrolment in *Mathematics, computer and information sciences* programs decreased by 8.2%, and enrolment in *Business, management and public administration* decreased by 4.4% compared to the previous year. These last two major field of study groups had the highest proportion of international students as the percentage of total enrolment, 59% and 48%, respectively, as of 2023-2024.

In **New Brunswick**, total enrolment increased by 0.7%, to **20,874** students. While international enrolment decreased by 2.1%, enrolment of NB residents increased by 1.8%, and enrolment of students from other Maritime provinces and Canadian students from outside the Maritimes increased by 0.7%.

In **Nova Scotia**, total enrolment decreased by 3.1%, to **49,542** students. The enrolment drop was driven entirely by international students (-14.9%) as domestic enrolment increased in all categories: NS residents up 1.9%, students from the other Maritime provinces up 1.4%, and Canadian students from outside the Maritimes up 1.9%.

In **Prince Edward Island**, total enrolment decreased by 2.3% to **5,566** students. Enrolment decreased among home province residents (-0.1%), students from other Maritime provinces (-1.4%), and international students (-6.6%). Enrolment of Canadian students from outside the Maritimes increased by 2.2%.

In 2024-2025, enrolment of Canadian students increased overall in the Maritimes: NB residents up 1.3%, NS residents up 1.8%, PEI residents up 1.6%, and other Canadians up 1.7%. The decrease in total enrolment was mainly due to a drop in the number of international students in the region. International enrolment in the Maritimes peaked in 2023-2024, reaching 21,902 students. Following the introduction of federal government caps on the number of study permit issued to international students and tighter conditions for study and post-graduation work permits, the number of international students dropped 11.3% between 2023-2024 and 2024-2025, to 19,432 students.

In 2024-2025, undergraduate enrolment of provincial residents increased in all three provinces, albeit the rate of the increase has not kept up with the recent population growth in the region. As a result, home province university participation rates decreased over one year by 0.3 percentage points (pp) in NB, 0.7 pp in NS, and 0.5 pp in PEI, and the participation rate of Maritimers in the Maritimes decreased by 0.6 pp.

Table 12: Full-time Enrolment by Province, Institution, and Age Group

How to read the tables

Enrolment statistics are reported at the provincial and Maritime level for the 2024-2025 fall term. The percent change over one, five and ten years (change since 2023-2024, 2019-2020 and 2014-2015, respectively) is provided to illustrate major trends. \*Percent change is not reported for cells with small n. Below each summary table is the title of a corresponding table on the MPHEC website with a breakdown by university and other variables available at: <http://www.mphec.ca/research/maritimeuniversitystatistics/enrolment.aspx>

University enrolment is calculated from data in the MPHEC Postsecondary Student Information System (PSIS), which contains detailed information on demographics, programs and courses for all students enrolled in 15 publicly-funded Maritime universities. Definitions and notes for each variable are available here: <http://www.mphec.ca/research/maritimeuniversitystatistics/definitions-notes.aspx>
